

PlanterWorld

planters and containers

Made in Britain

PlanterWorld's ever growing range of designs offer both classic and unique planters to the wholesale and trade markets.

The combination of quality and innovation offers great value-for-money to traders selling on to retailers.

All our planters are made in Britain from recyclable plastic and black planters are recycled material!

The planters are frost proof and have a high UV stability, which means they look great for many years.

All cubes and troughs have moulded risers in the base, creating a reservoir to conserve water, reducing maintenance and saving plant replacement.

The Havana Range

Comprising of 3 sizes and four colourways (Grey Granite, Light Marble, Dark Granite and Sandstone), the Havana range offers tremendous scope for display, using individual pots or a mix of sizes to create a large tiered presentation.

Product Code	Dia. mm	H mm
H4060	390	600
